

# THINGS TO HAVE IN A HOME DISASTER EMERGENCY KIT

## WATER

In general, you should plan for one gallon of water per person per day for drinking, washing and other needs. If you have pets or children, plan for more to cover their needs as well.

## FOOD

Include canned proteins like tuna and chicken, or vegetarian protein options—and don't forget a can opener! Other options are fully cooked premade meals with canned fruits and vegetables as well as nutritious grains like whole grain breads and crackers. Don't forget about allergies and dietary restrictions and food for your pets, too.

## MEDICAL SUPPLIES

Always be sure to have a stocked first aid kit on hand, and before the storm make sure you have enough prescription and over the counter medication for your family.

## OTHER ITEMS

Other items that might be important to have on hand include flashlights with extra batteries, a weather radio, entertainment options, a tool kit and whatever else will help keep your family comfortable.
